To read **Report on the Work of the Committee Appointed by the Sanitary Institute of Great Britain to Practically Test Ventilating Exhaust Cowls** eBook, remember to refer to the link under and download the document or get access to additional information that are in conjunction with REPORT ON THE WORK OF THE COMMITTEE APPOINTED BY THE SANITARY INSTITUTE OF GREAT BRITAIN TO PRACTICALLY TEST VENTILATING EXHAUST COWLS ebook.

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 46 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1901 Excerpt: . . . along open vertical pipes. In the course of these experiments when, Miniature Bobinson Anemometer, 1-in. Cups, 1-in. Arms. Experiments by Mr. W. H. Dines, at Oxshott, 1896-7, and Hershaw, 1889. in addition to the anemometer, a Dines Pressure Tube had been installed at the Hut, simultaneous readings were obtained from the pressure tube, the Kew Pattern Anemometer, the 1-inch cup instrument, and at the same time the flow of air up two of the tubes, which may be called the upcast, was also determined. During these experiments the Dines pressure tube occupied the position of the central pipe referred to later on, but the upcast for that pipe could be inferred from the flow of the two outer pipes in a manner which will be explained in the next section of this report. It is introduced here only as a basis for the comparison of the results obtained from measuring the wind velocity by the two anemometers and the Pressure Tube, and these results serve to indicate how far the factors of reduction adopted for the several instruments by the Cowl Committee, give concordant measurement of the wind velocity over the Hut. The results are represented, in the first instance, by Table XV. , which is summarised in Table XVI. , and the numbers are plotted on Diagram 25, p. 286, the curve of which accordingly represents the factors which must be employed to give the actual velocity of the wind (assumed to be correctly given...
