

## Clinical Medicine for Nurses

By Paul Henry Ringer

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 72 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1918 edition. Excerpt: . . . and that alone. This bacillus is motile, flagellated (possessing hair-like processes), grows best in bouillon or milk, is very resistant to cold, being able to live for three months in ice, is usually killed by a temperature of 60 C. (140 F. ), is always present in the stools, and usually in the urine. Modes of infection: 1. Direct. By contact with the stools or urine containing typhoid bacilli. The hands becoming contaminated, bacilli are easily taken into the mouth, and so into the intestinal canal. Carelessness with bedclothes, bedpans, urinals, or any articles or utensils coming in contact with the excreta of the patient may very easily cause attendants to acquire the disease. 2. Water. This is by far the most common source of all typhoid epidemics. If the water supply of a community is infected, practically every one not immune to...

### Reviews

*Merely no words to explain. I really could comprehend everything out of this published e book. I found out this publication from my dad and i suggested this publication to learn.*

*-- Prof. Margarita Ledner PhD*

*This written pdf is fantastic. It normally is not going to expense a lot of. It is extremely difficult to leave it before concluding, once you begin to read the book.*

*-- Gilbert Stroman*
