Non Point Source Pollution  
of Small Streams at  
Different Altitudes

Book Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | It is well known that watershed hydrology is dependent on many factors; land use, climate, and soil conditions. But the relative impacts of different types of topography and land use on the surface water are yet to be ascertained and quantified. Agriculture has been identified as a major contributor of non-point source pollution of water resources. Assessment of the environmental impact of NPS pollutants at a localized and regional scale is...
