

Laboratory Manual of Physiology

Filesize: 7.83 MB

Reviews

Excellent electronic book and helpful one. It usually does not cost a lot of. I am quickly will get a pleasure of reading through a written publication.

(Bernardo Feeney Jr.)

LABORATORY MANUAL OF PHYSIOLOGY

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 22 pages. Original publisher: Madison, WI : U. S. Dept. of Agriculture, Forest Service, Forest Products Laboratory, 2009 OCLC Number: (OCoLC)423386747 Subject: Wood -- Chemistry. Excerpt: . . . Chemical Yields from Low-temperature Pyrolysis of CCA-treated Wood 150 C at a heating rate of 50 C min, which was less than that for the untreated wood. After the initial weight loss step, the CCA components accelerated combustion. The temperature corresponding to the maximum rate of weight loss (T) was around 328 C for the CCA-treated wood peak sample, which was less than that for untreated wood (T_{peak} behave as accelerators to degrade wood samples at lower temperatures (Osawa 1988). The CCA treatment resulted-was around peak 367 C for the CCA sample, which was much lower than the Figure 10 - Thermogravimetric analysis (TGA) of un-value for the untreated wood (T_{peak} treated wood in air and in nitrogen at 5 and 50 C min. accelerated not only the decomposition of cellulose but also char oxidation. For nitrogen at 50 C min, the initial weight loss from the CCA-treated wood was the same as that from the untreated wood up through 250 C. This temperature was higher than the value obtained in air, showing again that wood decom-position is accelerated by oxygen. The maximum rate of weight loss occurred at the temperature of 359 C for the CCA-treated wood, whereas that value for untreated wood was 385 C. As a whole, these results indicate that the CCA components promote the thermal degradation of wood in ni-trogen. We observed that untreated wood had a shoulder lo-cated at the lower temperature region of the differential ther-mogravimetry (DTG) curve (data not shown...
