RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 28 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1897 Excerpt: . . . result shows that (OA, OA), (OB, OB), (OC, OC) are confocal. We get a similar result for any number n of straight lines OA, OB, OC, and c , the foci of the last ellipses being $(2a^2)$, and therefore independent of the order in which the lines OA, OB, and c , are taken. OA³ the difference of the squares of the semi-axes; 32 72 their sum. 13186. (H. Orfeur.)--If the denominator of the penultimate convergent of a continued fraction be equal to tho numorator of the ultimate convergent, the partial quotients equidistant from the ends are equal. 13026. (Kov. T. Roach, II. A.)--On the Bedford Level three poles of equal height are set up in a straight lino at distances of 660 yards, and a man looks from tho top of the first polo at the top of the third. Show that, owing to the...

Reviews

A new e book with a brand new standpoint. I am quite late in start reading this one, but better then never. I discovered this ebook from my i and dad advised this publication to understand.

-- Jada Franecki II

Here is the very best book i have got read through until now. I could possibly comprehended everything using this composed e publication. You will not sense monotony at whenever you want of your time (that's what catalogues are for concerning should you ask me).
