Excerpt: .necessity be equal as at A (163), but it is practically convenient to make them so. The design is could of course be woven; but, if the repeat of the turnover measured 9 inches, a manufacturer would not allow 18 inches for the single. In the same way the repeat of a border must naturally correspond at the side of a curtain with the depth of a filling pattern, and at the bottom with its width (162, 164)--and if part of the filling is single, the corresponding portion of the border also may be. In the case of a narrow and not very important border it may be shorter than the filling as long as its length is divisible into that--a 9-inch filling may have a border of 4! inches, or 3 inches, or 1\$. And so where the border is the main feature and the filling a mere diaper (164), that may measure only half or a third or a quarter of its length. And were it mechanically possible to weave border and filling the repeats of which measured respectively say 7 and 9 inches, it is doubtful if artistically it would be worth while: the simple thing to do is commonly the right one. It is sometimes desirable to make a curtain or other pattern complete in itself with start and finish (165). For working purposes these may be regarded as borders, and must conform to the conditions regulating border design. Further...
